### **CNS Continues as a Cisco Gold Certified Partner in USA**

Plainview, NY, Apr. 2, 2009 — CNS today announced that it has maintained the level of customer satisfaction and requirements to continue its status as a Cisco Gold Partner in the United States. CNS operates IT network operations and colocation sites in New York City, Long Island, New Jersey and Pennsylvania.

Cisco places great emphasis on customer satisfaction. In order to maintain Cisco Gold Certification, CNS participated in Cisco's customer satisfaction program and has again met all requirements for achieving Cisco Gold Certification. Requirements that were met include personnel, support, specialization and customer satisfaction. CNS has continued to demonstrate the ability to sell, install and support Cisco solutions nationwide.

“Recognition from a powerhouse such as Cisco demonstrates that CNS is making an impact throughout the global industry,” states Alan Cook, President of CNS. “We are committed to excellence in the delivery of Cisco products and solutions. I believe that it will also help CNS drive its reach further into the market and enjoy greater success.”

Founded in 1997, CNS's monitoring and management services support global clients; and on-site professional services successfully engineer, manage and install major networking projects to clients nationwide. Such positioning and the continued promotion of successful implementations enable CNS to achieve greater recognition by leaders in the field, thereby driving greater brand value throughout the industry.
