- Multiple generator backup
- Redundant AC and power feeds
- Tier III facility
- 10 Megawatts of power
- Metered power

The CNS Colo Datacenter provides secure, reliable, and effective operating environments

Organizations are recognizing the benefits of colocating mission-critical equipment within a data center. The CNS Colocation Center provides expert management services including the administration, monitoring, and maintenance of your equipment. With CNS, your business benefits from working with a single-source provider that understands the needs of maintaining your infrastructure.

Customers colocating their owned or leased equipment in CNS's new state-of-the-art colocation facility receive direct access to a robust IP backbone providing high-speed Internet connectivity and the dedicated infrastructure necessary to compete in today's marketplace.

CNS offers a secure, dedicated, carrier-grade environment to colocate your voice,

data, or Internet equipment. Our 100,000 square-foot location houses over one hundred employees offering 24/7/365 support to our expanding colo customer base. This multi-carrier facility features the sought-after Manhattan bypass, and more room is available for further expansion.

With certified CNS engineers constantly on-site, you can rest assured that your physical needs are in good hands. Now you have the opportunity to take advantage of the CNS Colocation Center's leading-edge environment and the infrastructure services necessary to deploy your IT assets. By colocating, you retain the flexibility to administer and access your own equipment and applications without the complications and expense of running your own data center.

intelligent choice

Some benefits you will realize when you host your IT infrastructure with CNS Colo:

- Reduce in-house staff.
- Concentrate on operations and content, not connectivity issues.
- Ensure optimal environmental conditions with constant temperature and humidity monitoring.
- Safeguard your business with consistent monitoring and support 24x7.
- Disaster protection and recovery.
- Access a wider scope of expertise, with certified personnel.

When the unthinkable happens, will you be ready?

Protect and archive your data in our secure, state-of-the-art facility at an affordable price based on your individual business needs. Built on award-winning storage networking technology and managed by data protection experts with decades of experience, CNS is recognized as an innovative leader in the data protection industry.

CNS Disaster Recovery Advantages

Why use CNS for off site data protection and archiving?

- Immediate deployment
- Rapid 24x7x365 data recovery with maximum capabilities
- Dedicated Disaster Recovery facilities
- Flexible pricing, cost-effective
- No need to build and staff a dedicated disaster recovery center
- No need to buy software and hardware for a disaster recovery center
- Rapid compliance deployment with minimal implementation costs
- Seamless scalability of data storage as your business grows
- End-to-end security
- Proven technology

With your disaster recovery plan in place, be confident in knowing we offer both private and shared spaces equipped with phones, computers, Internet access, copy machines and printers. We understand not all businesses are the same, and we are happy to set up the space according to your specific needs whether it is in regards to software, hardware, security, or connectivity, or even duplicating your existing office space!

Complete, cost-effective plans include the facilities, hardware, peripherals, crisis management, and technical support to help you plan for and recover from service interruptions. Let us show you how to use virtualization as a cost-effective way of controlling IT Disaster Recovery costs.
