- IMPORT / EXPORT MANAGEMENT

Focus on your business and reduce investment in areas such as equipment and facilities.

Many companies today are facing challenges when it comes to delivering computer equipment to their employees in a timely manner. Many times an organization's data center might not be ready to accept the equipment, or may not have a warehouse to facilitate this storage requirement.

Companies sometimes require that the computer equipment be delivered in a single delivery, while others want it shipped over an extended period of time. The staging of IT computer equipment is becoming more of an important and overlooked issue today. Companies can't afford to wait weeks at a time in order to get their standard laptop and PC configurations delivered. IT Computer Warehousing is becoming more common for mid-size companies in the United States.

At CNS we have been providing IT Computer Warehousing Services for our clients for the last 7 years. CNS can provide North America wide return to depot and warehousing services. CNS will work with you based on industry best practices on what policies should be in place in order ensure off-site IT Computer Warehousing is a success for your company.

intelligent warehousing

With a proven track record and an impressive customer portfolio, we will work to defined service levels to improve your entire supply chain. That allows you to focus on your core business activities and reduce or eliminate your capital investment in non-core areas such as equipment and facilities.

CNS offers the following IT Computer Warehousing services:

1. Secure warehouse storage
2. An experienced staff that knows how IT warehousing works
3. Fully insured warehouse
4. Repair services
5. 24-48 hour North American wide delivery times
6. Asset Management Services
7. Standard Image Laptop, Desktop and Server loading
8. A North American toll free number for placing requests available 24x7x365
9. Help Desk support

Benefits that you will see from using an outsourced warehousing solution:

1. Less of the day-to-day IT order headaches
2. Take advantage of volume purchasing discounts
3. Less employee downtime due to delays in ordering and shipping
4. Stock is always available to be shipped
5. You have the option to leverage additional IT resources from your outsourcing partner

A complete, integrated solution

CNS supply chain management, leading edge technology and the most comprehensive distribution network available ensure that our services continue to provide the best solution for your business needs.
